Allowable Subject Matter

This Office Action is in response to applicant's communication of 4/2/2009. Currently amended claims 1-15 and 18 are pending and in condition for allowance.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed injection device and method of wherein the inner housing is in contact with and acts on barrel and is movable by the energy source and operates in three modes "and wherein in the first mode the inner housing is intermediate the outer housing and at least a portion of the plunger" and in the second mode "the inner housing is intermediate the outer housing and at least portions of both the barrel and plunger". Similarly the method claim of 18 is being allowed because the prior art fails to disclose the specifics of the device with the combination of "therein the inner housing is intermediate the outer housing and at least portion of the barrel and the plunger while the plunger is moved axially in the first direction with the barrel".

The closest prior art of record is Crossman et al. (U.S. Patent Number 5,300,030), however this reference does not disclose the injection device and method as specified above particularly wherein in the first mode the inner housing is intermediate the outer housing and at least a portion of the plunger and in the second mode "the inner housing is intermediate the outer housing and at least portions of both the barrel and plunger.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
